Subject: mesaba project

Please do everything you can to stop this project. It is not something people I have talked to want in our back yard. I do not want an increase in cancer rates, decrease in tourism, 9 additional railroad tracks in downtown Grand Rapids, water levels, air quality decline and the list goes on. There are so many alternative energy sources we should be sinking money into. Thank you. Sincerely, Ann Vucetich, Hibbing, Minnesota (#218/263-3835)
